

Early Learning

<https://earlylearning.edonline.sk.ca>

The Early Years Branch in the Ministry of Education is pleased to announce a new portal for the early learning sector. The *Early Learning* portal was created to promote better communication and easier access to early learning documents, resources, professional learning opportunities and current information on new initiatives, announcements and updates.

This portal will continue to grow and evolve as resources are identified, new learning opportunities become available and feedback from the sector is received.

The portal is organized into four sections:

1. What's New? - contains information about new learning opportunities, announcements, and resources. Check in often to stay up to date.
2. Programs – provides a list of specific early childhood programs with links to relevant documents and resources.
3. Resources – contains documents, brochures, and other support organized into topic areas.
4. Learning Opportunities – contains a list of professional learning events such as workshops, seminars, webinars, site visits.

The link to the *Early Learning* portal is <https://earlylearning.edonline.sk.ca>

Please enjoy exploring and becoming familiar with the portal. Feedback may be sent to ece@gov.sk.ca
